To my sister

Jean Olive

A graceful lady who most

taught me to aspire

ACKNOWLEDGMENTS

I am eternally indebted to the many teachers, instructors, and professors under whom I have been fortunate to study. These include, among others, Coaches James Mashburn, Frank King, Vernon Price, Bob Callicutt, and Press Mull through secondary school; Coaches Bones McKinney, Dean Smith, Jack Murdock, Jim Layton, and Jack McClosky through university years; and Coaches Richard Jones and Mike Gurley.

The last thing my family wanted me to do was write another book. Once more they, and now even my grandchildren, from whose attention these projects take me, have been understanding.

My faithful staff, including Iris Hyatt, Chasity Clodfelter, Jennifer Wagoner, and Elizabeth Lancaster, have once more proved invaluable as I completed this project. I would like to express particular gratitude to four of my assistants to whom this book was primarily assigned. Cindy Venable, Erin Younts, Kristina Home-sley, and Abby Younts have worked tirelessly and with remarkable precision in transcribing, proofing, and assisting me in coordinating the final draft.

Editing is always the final component for a written project. Nell Haynes Sharpe, my dedicated former English instructor, painstakingly reviewed each page of *Word for Word*. I am grateful for her guidance.

A high five goes to Marian Lizzi, editor in chief of Perigee Books. This manuscript caught her eye. She recognized my dream to create a simple way to collect and define many of the most extraordinary—and extraordinarily useful—words of our language, so that readers will never be at a loss for just the right word.

PREFACE

One day a friend visited my law office and used the word *animadversion*. I was impressed. I didn't know what it meant. When our visit ended, I looked up the word in a dictionary. It was defined as *aspersion*—handy, if you know what *that* means. I soon learned that *aspersion* is defined as *calumny*. *Calumny*? I looked that one up, too, and discovered it means *slander*. Finally, a word I recognized.

This little exercise provided a valuable insight. If you don't know what a word means, the dictionary isn't always a useful resource. (To a lesser extent, the same is true if you don't know how to spell a word.)

One thing led to another, and before I knew it, I had a growing collection of lexicographic discoveries—the most beautiful, unusual, and nuanced words of our language, paired with their simpler, more familiar equivalents. This list proved to be surprisingly useful: Simpler than a dictionary and more straightforward than a thesaurus, it served as a handy desk reference—an at-a-glance guide to the words of Shakespeare, Wordsworth, and Longfellow, and many other writers and speakers of eras gone by.

In these days of emails, text messages, and frenetic multitasking, the beauty of our language is often lost. We tend to view words as a means to an end rather than a gloriously varied and appealing set of paints with which to express ourselves. We take precious little delight in selecting the right word for any given context or occasion. Sadly, something essential to our culture and our sense of selves has been lost.

Thus, *Word for Word* was created as a small gesture toward dialing back our modern sensibilities and making use of the wide array of spectacular words too many of us have forgotten or never known.

In my attempt to make this book as useful as possible, I have had to make a number of difficult choices. After all, not every complex word has a simple one-word definition. When there was a judgment call to make, I have opted for the most common, simple, generic, and encompassing word possible.

For the most part, “terms of art”—such as scientific, medical, and legal terms, and words specific to other realms—have been omitted. Words in this category are included if they are reasonably applicable in daily life.

I challenge the reader to learn every entry. This can be accomplished in a year by memorizing six words daily. But, as you know, it is easy to forget those words, so you must have a system. Each day you must not only learn six words but also review a number of words that you have previously learned. This process requires only a few minutes each day. Even a simple mind like mine or a great mind like yours can commit these words to memory and use them on a regular basis.

Part I, “COMPLEX WORDS to common words,” invites the reader to absorb and enjoy the richness of alphabetized complex words. Part II, “common words to COMPLEX WORDS,” provides unique access, via one-word definitions, to beautifully complex words you might never have used (or even come across) before.

Enjoy!
